![convergence data - Data-Driven Decisions]

About Convergence Data

Convergence Data (CDS) has specialized in data classification and enrichment for Engineering and eCommerce for over two decades. We help organizations accelerate parts and product data readiness through classification services, Design for Retrieval (DFR) SaaS software solution, and integration with third party content.

Proven Methodology of Integrating Third-Party Content

Harvest Legacy Data → **Build Categories & Attributes** → **Import Third-Party Content** → **Validate Enriched Data** → **Release to PLM**

Driving Strategic Outcomes

- Reduce inventory levels
- Improve Procurement, Plant, and Worker Productivity
- Manage Direct Materials Spend
- Address Compliance Regulations and Requirements
- Drive Better UX and Reduce Duplicates via Part Findability
- Manage Part Obsolescence

Third Party Content Providers Supported

SiliconExpert   **traceparts**

Octopart   **IHS Markit**
